American Made

Designed for the Extremes of the Inland Northwest

With more than 300 Roofing options to choose from, and quality standards that lead the industry, you can rest easily knowing Certainteed has you covered.

Dozens of supply, manufacturing, and distribution facilities across North America ensure that our portfolio of products unifies best-in-class technology, innovative materials, and beautiful aesthetics.

Select Shingle Master™

The SELECT ShingleMaster™ credential represents the highest standards in the shingle roofing industry.

It includes a rigorous process, including several significant educational and accreditation steps - a mark of distinction that separates SELECT ShingleMasters™ from all other companies. The company must continue to meet the following requirements to maintain the credential:

- The Most Well-Qualified Installers
- Product Knowledge
- Ethical Conduct and Customer-Focused
- Insured and Established
- Up-to-date and Ongoing Credential Requirements

“ A SELECT ShingleMaster™ is in the top 1% of his profession. ”

- 1 Waterproofing Underlayment**
Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.
- 2 Water-Resistant Underlayment**
Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.
- 3 Starter Shingles**
Starter Shingles are the first course of shingles that are installed and designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.
- 4 Shingles**
Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.
- 5 Ventilation**
Ridge Vents, in combination with Intake Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.
- 6 Hip & Ridge Caps**
Available in numerous profiles, these accessories are used on the roof's hip and ridge lines for a distinctive finishing touch to your new roof.

Integrity Roof System

A complete approach to long lasting beauty and performance.

With as much care as you take in selecting the right contractor, choosing the right roof system is equally as important. A Certainteed Integrity Roof System combines key elements that help ensure you have the well-built roof for long-lasting performance.

StreakFighter®

Algae Resistance

The Ultimate in Stain Protection

Those streaks you see on other roofs in your neighborhood? That's algae, and it's a common eyesore on roofing throughout North America. Certainteed's StreakFighter technology uses the power of science to repel algae before it can take hold and spread. StreakFighter's granular blend includes naturally algae-resistant copper, helping your roof maintain it's curb appeal and look beautiful for years to come.

CertaSeal®

Uplift Protection

The Ultimate in Sealant

CertaSeal® is a fast-activating modified asphalt sealant with a 20-year record of proven performance. Designed to seal shingles together upon installation, it protects roofs from wind uplift and shingle blow-off so that homes stay safe and dry. It's also engineered to remain flexible after installation, unlike harder sealants that can dry out and crack over time.

Designer Color Palette

The Widest Array of Colors in the Industry

These shingles come in a variety of colors, ensuring that homeowners can find the perfect match for their home's aesthetic. The shingles' multi-layer design provides superior protection against the weather, helping to ensure that the roof remains in good condition and well-protected against the elements.

Envision your roofing and siding project in minutes using a photo of your home and our ColorView AI technology.
